INSTANT POOLS • TIMELESS STYLE

**IF YOU ARE THINKING ABOUT A PRE-CAST  
CONCRETE OR SHIPPING CONTAINER POOL,  
YOU REALLY NEED TO READ THIS !**

Introducing the Little Pool Co.  
Ready-made free-standing fiberglass pools

**Modular plunge pools made from pre-cast concrete or converted shipping containers have become very popular in recent years. We have created a far better alternative. Your luxury backyard deserves a pool from The Little Pool Co.**

The Little Pool Co is the latest innovation from leading fiberglass pool manufacturer, Compass Pools Australia. Our ready-made fiberglass pools come with everything you need to create a stunning backyard oasis without any of the hard work. When your customers ask about alternatives, think about these factors.

**Weight** - A 20 foot concrete pool can weigh as much as 25,000 lbs. Shipping containers 15,000 lbs. A fully equipped 20 ft Little Pool weighs less than 3000 lbs! That means a Little Pool can be thousands less to ship and install. You can save thousands on installation! Our patented structural support system is made using GRP technology which makes our pools ultra-light and easy to maneuver into difficult sites. Install time is far less with a Little Pool.

**Finish** - Concrete and shipping container pools need some sort of liner or interior finish to make them into a pool, otherwise you just have a steel box or a concrete tank! Concrete pools need to be refinished every 10 to 15 years, Spray on finishes about the same. Vinyl liners last about 8 to 10 years. The finish on a Little Pool is easier to maintain, can reduce the use of chemicals, and can last a lifetime.

**Quality** - Shipping containers are really steel boxes designed to keep water out and keep things inside safe. Making one into a pool turns this on its head! What happens when you put steel in the ground, or add chemicals like chlorine. How about a salt chlorinator? What happens to concrete when it is exposed to the elements for 5, 10, or 15 years? A little Pool is made of modern resin materials with state of the art technology. Compass Australia invented most of the technology used in modern fiberglass pools. Little Pool Co uses a strong ceramic core and beautiful bi-luminite colors. Our patented structural support system is made using GRP technology. GRP is super strong, cannot rust, rot or be degraded by pests, which makes it the perfect support material for an outdoor pool.

**Warranty** - Most pre-cast concrete pools carry a 10 year warranty. Shipping containers far less. In some cases only a year or two. A little Pool has a 10 year warranty on the GRP frame, and a 25 year pool shell warranty.

## INSTALL ABOVE GROUND, PARTIALLY INGROUND, OR FULLY INGROUND

Urban sites continue to get smaller which makes access more difficult for excavation equipment. We can remove the hassle of having to complete a major excavation and still provide a pool that rivals any in-ground option. Little Pool Co pools provide a true luxury alternative, whether installed inground, semi-inground or completely above ground. You just need a simple a paver pad or reinforced concrete slab.

### A Relax 4.0 Little Pool in Hudson, NY

This required a lift over a 3 story townhouse with a backyard that was 20 feet wide and has a 45 degree slope. The estimate using a pre-cast concrete pool was as much as \$30,000 more expensive.

## ORDER WITH A FULLY CLAD EXTERIOR OR CREATE YOUR OWN FINISH

- ✓ Order fully or partially clad with exterior ACM panels (choose from eight colors)
- ✓ Clad with your own preferred cladding material – simply fix directly to the GRP frame
- ✓ Attach decking directly to the GRP support structure
- ✓ Each pool is pre-plumbed and fitted to order, with dozens of options for heat, sanitation, and automation.
- ✓ cut installation time by one half or more.

## INTERESTED IN A LITTLE POOL FOR YOUR BACKYARD OASIS?

If you want to hear more about the Little Pool Co family of plunge pools, then we would love the opportunity to talk more with you. In the meantime, we have created this info pack to give you a sneak peak of what's on offer.

We'll aim to touch base with you to introduce ourselves properly over the next few days, but please feel free to contact me directly, **800 416 5620 ext 104** at your convenience with any questions.
